

**IC200TBM001
Barrier-Style Auxiliary I/O Terminal Strip**

The Barrier-Style Auxiliary I/O Terminal Strip (IC200TBM001) has two groups of 6 internally-bussed barrier-style wiring terminals. The two groups are isolated from each other. It can be used to provide extra field wiring connections for terminal-style I/O Carriers and Interposing I/O Terminals.

Mounting tabs on the upper edge of the Auxiliary I/O Terminal Strips insert in slots on the bottom of the I/O Carrier or Interposing I/O Terminals for fast, convenient installation. Additional Auxiliary I/O Terminal Strips can be connected in the same way. The Auxiliary I/O Terminal Strip also has panel-mount holes for added stability in high-vibration locations.

The Auxiliary I/O Terminal Strip can accommodate current levels up to 8 Amps and voltage up to 264 VAC. Voltage levels up to 300VAC will not damage the unit.

There is no electrical connection from the Terminal-Style I/O Carrier or Interposing I/O Terminals to the Auxiliary I/O Terminal Strip; any necessary electrical reference must be provided.
